ERICSSON

SOURCING CLM

INTRODUCTION GUIDE

COLLABORATION COMPLETED

WHAT IS ACCESSIBLE?

WHAT IS ACCESSIBLE?

- After the negotiation is finished within the SCLM tool, the status of the contract document will be changed by your Ericsson contact person into Ready for signing. You will still be able to access all contract document versions, discussions and attachments that were made during the negotiations.

- When a contract document is signed, Ericsson Sourcing Agreement owner will change the agreement status to valid and scan and upload the contract document as a pdf-file that will also be accessible for you to view. You can find this scanned copy of the signed agreement on the Contract document level just above the section: “Version history” in the section “Final signed document” under the field called “File name”.

Final Signed Document

File name: CONTRACT-26360 (2).doc

Version History

Compare
