

ERICSSON MOBILITY REPORT: INDIA APPENDIX

Total number of mobile subscriptions in India is expected to increase to approximately 1.4 billion by 2020, resulting in a population penetration of 100%

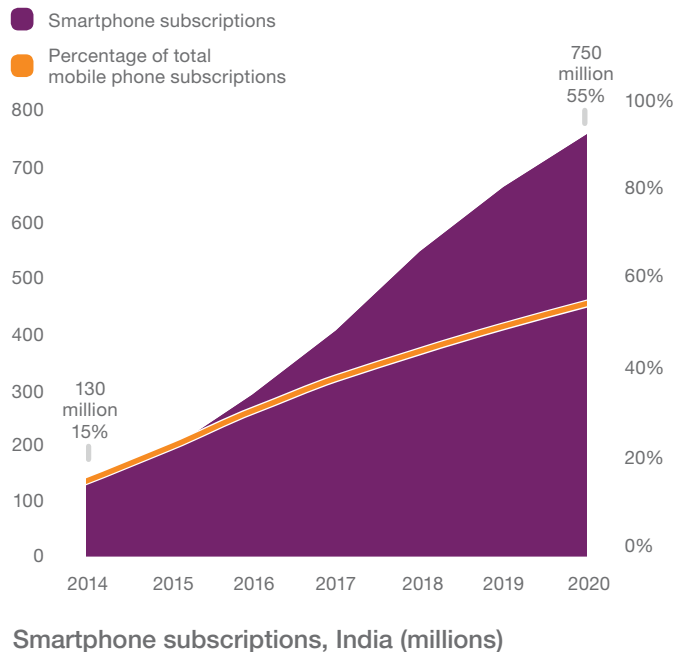

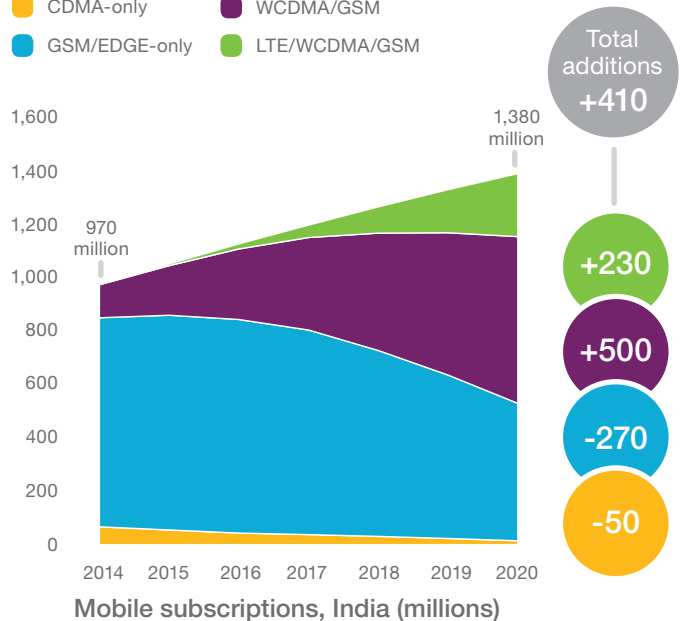

"Smartphone subscriptions and traffic, India"

There is major momentum for greater connectivity in India

- CDMA-only
- WCDMA/GSM
- GSM/EDGE-only
- LTE/WCDMA/GSM

By the year 2020, we expect:

- GSM/EDGE subscriptions to decline from 780 million in 2014 to around 510 million
- WCDMA/HSPA subscriptions to increase from over 120 million in 2014 to around 620 million
- LTE subscriptions to reach more than 230 million, forming around 17% of the total subscription base

GSM/EDGE technology currently has the widest reach in India

LTE to cover 40% of population by 2020

India population coverage by GSM/EDGE, WCDMA/HSPA and LTE technologies
