*In your mind when working in the system:*

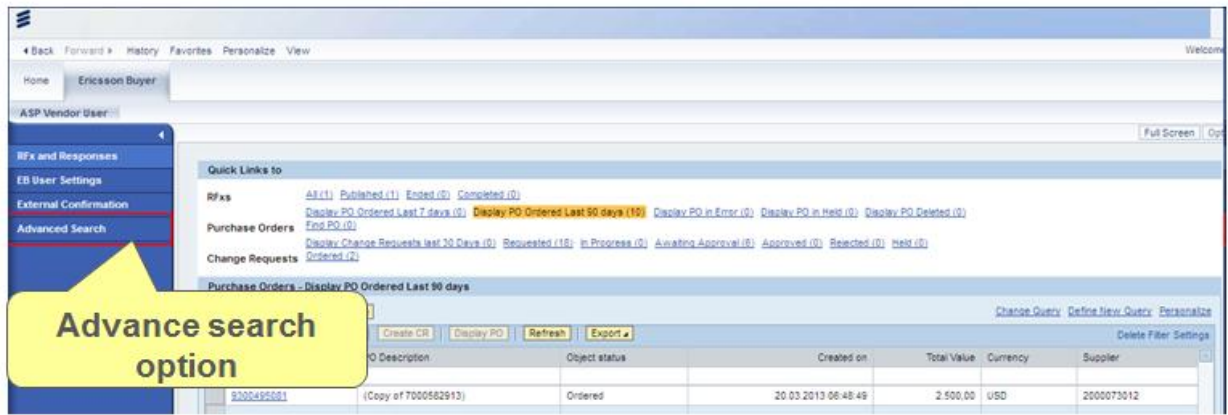

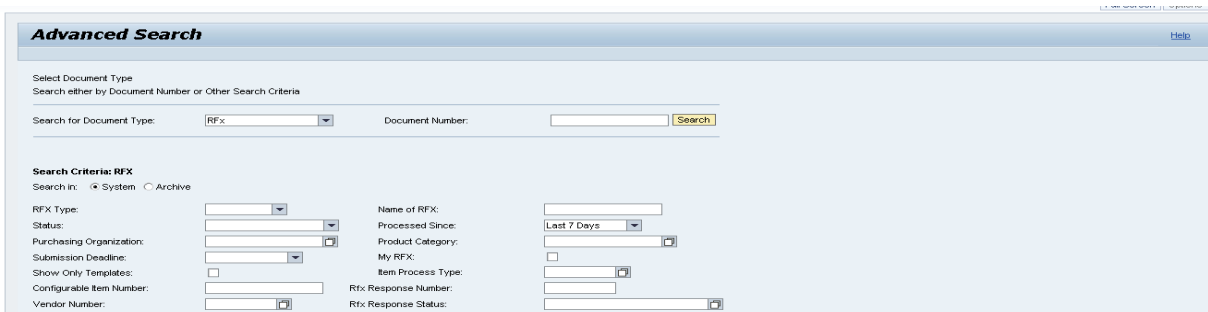

- **Never** use the **back**-button in **Explorer** if you want to go back to the previous page in the system. Use the EB system previous-buttons instead.
- The Ericsson Buyer system is mixing the terms **Vendor** and **Supplier**. At Ericsson we call them Supplier.

## Advanced Search for supplier users

The "Advanced Search" option is added for the supplier users. This facilitates them to search RFX, Purchase Orders, Confirmations and Change Request (added in 1403 release, without having to pull a Business Warehouse (BW) report.

For Performance reasons, the time frame is restricted for less than 30 days.

ASP user would still continue to access BW report.

The screenshot shows the 'Advanced Search' form. At the top, it says 'Select Document Type' and 'Search either by Document Number or Other Search Criteria'. Below this, there are input fields for 'Search for Document Type' (set to 'RFX'), 'Document Number', and a 'Search' button. Under 'Search Criteria: RFX', there are several search filters: RFX Type, Status, Purchasing Organization, Submission Deadline, Show Only Templates, Configurable Item Number, Vendor Number, Name of RFX, Processed Since (set to 'Last 7 Days'), Product Category, My RFX, Item Process Type, Rfx Response Number, and Rfx Response Status.
