

In short:

EB ASP application is not compatible with Internet Explorer 10. Until it is officially tested and released for use we request to roll back to previous version of internet explorer.

More details:

It is observed that some External Users of Ericsson Buyer application (EB ASP Flow), have upgraded their Internet Explorer to IE10. Due to this, these users are getting a blank screen preventing them from accessing the EB application. The compatibility of Ericsson Buyer with IE 10 is yet to be tested by Ericsson for its users. Until it is officially tested and released for use we request to roll back to previous version of internet explorer.
