Disclosure Management Approach 2016

Global Reporting Initiative
OVERVIEW

Disclosure on economic items is included in the Ericsson Annual Report 2016.

The Sustainability and Corporate Responsibility (CR) Report is published including environmental, social impact, human rights, employment, occupational health and safety, training and education, diversity, supplier assessments and grievance mechanism information according to Global Reporting Initiative (GRI) Sustainability Reporting Guidelines GRI G4.

Materials, energy, water, emissions, products, services and transport environmental aspects areas are reported in Environmental performance indicators according to GRI G4.

Disclosure on Product Responsibility is included in Product Responsibility performance indicators. Ericsson has implemented a Circular Economy Program including design and product take back.

POLICIES

Corporate financial accounting and reporting are conducted according to high quality standards. In addition, Ericsson ensures that high auditing standards are applied by external financial auditors. The Board of Directors’ Report, Annual Report 2016, contains an analysis of Ericsson’s consolidated financial statements and operational results.

Group Policies are approved by the CEO and are mandatory for all employees. Main Policies related to environmental and socio–economic issues are:

- Code of Business Ethics
- Code of Conduct
- Diversity Policy (Internal)
- Sustainability Policy
- Occupational Health and Safety Policy (Internal)

Operational responsibility for product responsibility areas is held by the head of Business Units.

Senior Vice-president and Chief Sustainability Officer and Head of Group Function Sustainability and Corporate Responsibility is responsible for sustainability and corporate responsibility defined as the integration of social, environmental and economic issues in a triple bottom line context.

MANAGEMENT

Financial Highlights for the past five years can be found in the Annual Report 2016. Ericsson has customers in more than 180 countries, and sales per region can be found in the Annual Report 2016. Ericsson ensures that high auditing standards are applied by external financial auditors. The group auditors are appointed at the Annual General Meeting of Shareholders (AGM).

Management of environmental issues and occupational health and safety issues are integrated into the Ericsson Group Management System (EGMS).

EGMS is certified according to ISO 14001 since 2001 and according to OHSAS 18001 since 2012. The scope of the global certificate is the management, development, product management, production, supply, sales and support of telecommunications products and services worldwide.

GOALS AND PERFORMANCE

Targets are set, followed-up and reported periodically according to Ericsson Strategy and target setting process. Objectives and achievements are deployed throughout the organization and are reported as part of the Ericsson Sustainability and CR Report 2016.
TRAINING AND AWARENESS

Environmental awareness is part of the Sustainability and Corporate Responsibility e-learning for all employees. Environmental training for experts also includes Design for Environment and Product Take-Back.

Social, labor practices, human rights, employment, occupational health and safety and diversity awareness is part of the Sustainability and Corporate Responsibility e-learning for all employees. Supplier Code of Conduct training also includes human rights issues.

CONTEXT

Key achievements are described in Annual Report 2016. Major organizational risks and opportunities are described in Annual Report 2016.

Key achievements and major social impact, labor practices, human rights and occupational health and safety risks and opportunities are described in the Sustainability and Corporate Responsibility chapter within Ericsson Annual Report 2016 (Pages 48-50) and Ericsson Sustainability and CR Report.

There were no major changes in the reporting period to systems or structures.
