Economic performance

| | | |
|---------|---|---|
| G4-EC02 | Financial implications and other risks and opportunities for the organization's activities due to climate change. | Sustainability and Corporate Responsibility in the Annual Report (Pages 50-51). Ericsson publicly disclosure climate change risks and opportunities through CDP annually, according to CDP deadline. Please see latest available Report. |
|---------|---|---|

| | | |
|----------------------------------|--|--|
| G4-EC04 | Financial assistance received from government. | <p>The occurrence of government grants is very limited. They are normally Reported as reductions of development costs or reductions of capital expenditure, depending on their nature.</p> <p>In 2014, we signed our first public private partnership engagement with a national development agency, UK Department for International Development (DFID), to expand secondary education to thousands of marginalized girls in Myanmar. DFID is providing approximately £3.7 million in funding, distributed in two years, which will be matched by Ericsson through cash and in-kind contributions. DFID funding primarily be used to pay partners engagements in teacher training and Monitoring and Evaluation.</p> |
| Indirect economic impacts | | |
| G4-EC07 | Development and impact of infrastructure investments and services supported. | Description of significant economic impact can be found in Communication for all in Ericsson Sustainability and CR Report (Pages 42-51). |

ENVIRONMENTAL - PERFORMANCE INDICATORS

Materials

| | | |
|---------|-------------------------------------|---|
| G4-EN01 | Materials used by weight or volume. | <p>Ericsson requires material declarations for all parts and components included in products. Based on this information Ericsson can compile and analyze the material content for individual products. For example, in a typical radio base station with the total weight of 110 kg the materials used are approximately:</p> <ul style="list-style-type: none"> • Metals: 100 kg • Polymers, ceramics: 9 kg • Additives: <1 kg • Precious metals: 0,1 kg <p>Total weight of products put on the market (excluding packaging) 165,000 tonnes approximately.</p> <p>Parts of this standard disclosure are no applicable, as it can be estimated that we use metals with a global average recycling ratio. The smelting and refining of minerals often combines materials from many different sources, making it difficult to trace their origin after refining.</p> |
|---------|-------------------------------------|---|
